Political Parties and Electoral Systems is a course taken by the students of the second year (BA) of Political Science. The course is divided in three parts: the first part deals with the functions and typology of political parties, the second part deals with the functions of electoral systems and how they are linked with political parties and the third part covers the typology of political parties and events in the post- communist countries with focus on Albania. The students have to analyse the dynamics of the political parties using the theoretical frameworks provided in the lessons. Problem Based Learning techniques is used to motivate students to analyse the events and then they are supplied with the theory in order to understand whether their previous analysis was solid and valid. The students have to analyse a current event in the political space and prepare the OpEd of the Magazine. During the seminars the students will analyse the political parties' attitudes towards policy making, the laws these parties propose and the actions they take in the political sphere. The debate in the classroom will be organized around these topics. The Front Page will take a final shape at the end of the course. Based on the number of the students it is foreseen to have around 10 Front Pages. The students work will be exhibited in the hall of the University. During the exhibition, the students will have the opportunity to defend their work. An external committee will evaluate the students' products and arguments and will choose the winner. The best Front Page will be published.

Integrimi i palëve të interesuara shoqërore

Palet e interesit nuk jane perfshire drejtperdrejte ne kete burim. Megjithate, metoda e te mesuarit i adresohet ceshtjeve te pjesemarrjes dhe i lejon studentet te eksplorojne role te ndryshme te paleve te interesit (politikane, OJQ, aktiviste politike, gjykates) ne lidhje me eventet politike aktuale. Megjithate, projekti do te kulmoje me nje ekspozite te Opinionit Editorial dhe ne ate rast perfaqesuesit nga sfera e medias dhe politikes mund te marrin pjese. Me tej, palet e interesit mund te ftohen ne nje ose dy leksione per te marre pjese ne nje diskutim ne klase.

Pika e forte

- Students learn to work in team;
- Students learn to learn to solve real-life relevant problems
- Students practice and develop skills of listening, discussion and persuasion
- Students learn to discuss on controversial issues;

Pika e dobët

- I haven't envisaged any weakness.

Rezultatet e të mësuarit

- Te reflektoje ne kontemporanitetin e vendit
- Te zhvilloje krijueshmerine dhe aftesite e te menduarit ne menyre te pavarur
- Te adoptoje imagjinate
- Te zhvilloje diskutimin dhe aftesite e bashkepunimit

Lidhja për qëndrueshmëri

Studentet mesojne aftesite qe i lejojne ato te mendojne ne menyre kritike, te forcojne imagjinate dhe te diskutojne ceshtje te nderlikuara. Ne kete menyre ata nuk mesojne gjerat thjesht permendesh por perdorin logjiken dhe kjo eshte thelbesore per te arritur njohuri te qendrueshme. Ne te njeten kohe leksioni behet me argetues dhe me pak serioz dhe si rrjedhoje studentet kenaqen me teper me te.
